

KE

SPACE & SPACE WALL

SPACE

Space is an elegant and modern tension rollup shade system designed to mount with bracket attachment onto pre-existing substructures such as any pergola or similar structure. It is available with strip LED lights, transformer (included) and 24V DC Receiver (optional). An optional fabric locking system keeps fabric tight for a neater appearance and improved performance.

SPACE WALL

Space Wall attaches to a wall, soffit, or roof with 2 supporting legs. It is available with strip LED lights, transformer (included) and 24V DC Receiver (optional). An optional fabric locking system keeps fabric tight for a neater appearance and improved performance.

SPACE

SPACE WALL

Optional fabric locking mechanism fits to the top of the rail without effecting the visual appearance of the unit.
